Takaoka, Toyama — Open to Relocation · Remote OK

Engineer / Specialist in Humanities Visa — No Employer Restrictions

PROFESSIONAL SUMMARY

Aspiring backend and cloud engineer who designed, built, and deployed a full-stack web application on AWS (React, Node.js/Express, PostgreSQL on RDS; S3, CloudFront, EC2, nginx, PM2). AWS Cloud Practitioner certified and currently studying for Solutions Architect – Associate. Trained in software development at a Tokyo vocational school (C#, JavaScript, SQL) and delivered several web and game projects end to end, including a title exhibited at Tokyo Game Show 2025. Currently a semiconductor equipment engineer, where precision assembly, troubleshooting, and SOP documentation built the zero-defect discipline I bring to reliable system operations. Trilingual (Japanese N2, English, Hindi); seeking a backend or cloud engineering role in Japan.

PROJECTS

TechMatch Japan

FULL-STACK · LIVE ON AWS

React · Node.js · Express.js · PostgreSQL · Chart.js · JWT · i18next · AWS (S3, CloudFront, EC2, RDS)

[Live](#) [GitHub](#)

- Solo project, deployed on AWS: a bilingual (JP/EN) IT career intelligence platform with a salary analytics dashboard (Chart.js), skill gap analyzer, and job filtering with sorting, pagination, and shareable URL state
- Implemented JWT-based authentication (register, login, profile), saved searches, and a skill profile that persists across sessions; REST API with 17 endpoints on Express.js and PostgreSQL
- Designed and deployed the architecture on AWS (S3 + CloudFront for the React frontend, EC2 with nginx and PM2 for the API, RDS for PostgreSQL), serving the site and API over HTTPS through CloudFront; wrote deploy scripts; applied code-splitting (596KB → 337KB bundle)

Wilderness Sniper

PUBLISHED ON ITCH.IO

Unity · C# · TextMesh Pro · Coroutine System

[itch.io](#) [GitHub](#)

- Designed and built a 2D arcade shooter with full UI/UX: main menu, pause, game-over/clear screens, and interactive tutorial
- Developed “Error Code” timed puzzle mini-game with WASD input, coroutine-driven animations, and real-time validation
- Integrated audio system, dual-UI scoring, and resolution optimization across screen sizes over 3 months (12 commits)

ShadowNyanNyan

TGS 2025

Unity · C# · 2D Physics · Team Project

[GitHub](#)

- Co-developed a 2D platformer exhibited at Tokyo Game Show (September 2025)
- Implemented dual-character control with camera routing, shadow-follow logic, and Rigidbody2D physics
- Served as primary debugger for level integration; resolved cross-team code conflicts and merge issues

SKILLS

LANGUAGES

C# JavaScript Python C++

Java (basic) HTML5 CSS3

SQL

FRAMEWORKS & LIBRARIES

React Node.js Express.js

Next.js (basic) Chart.js

ENGINES & TOOLS

Unity Unreal Engine

Git/GitHub Firebase

PostgreSQL Blender

CLOUD

AWS S3 CloudFront EC2

RDS

EDUCATION

Diploma in Game Programming

Tokyo Cool Japan Academy
Apr 2024 — Mar 2026

Japanese Language Studies

Toyo Language School, Tokyo
Jul 2023 — Mar 2024

MBA in Information Technology

Amity University, India
Dec 2019 — Dec 2021

Bachelor of Commerce

Thakur College, India
Apr 2015 — Apr 2018

CERTIFICATIONS

- AWS Cloud Practitioner — Sep 2026
- JLPT N2 — Jul 2025
- Game Dev with Unity — Mar 2022
- Advanced Excel — Jul 2021

LANGUAGES

Japanese Business / N2
English Business

Kanaubito

NARRATIVE GAME

Hindi

Native

Unity • C# • ScriptableObject • 2D Top-Down

GitHub

- Built complete inventory system (5 scripts) with ScriptableObject data architecture, drag-and-drop UI, item stacking
- Developed day/night cycle with Light2D transitions, fade-to-black coroutines, and event-driven NPC behavior
- Designed full school environment layout and player flow for level design

Client Portfolio Site

DELIVERED

HTML5 • CSS3 • JavaScript • Firebase

Live

- Built foundational bilingual (JP/EN) portfolio structure for a fellow developer with responsive layout and navigation
- Delivered a reusable, customizable template deployed via Firebase Hosting

Personal Portfolio

LIVE

HTML5 • CSS3 • JavaScript • Firebase • SEO

Live GitHub

- Built a fully responsive bilingual (JP/EN) site from scratch with dynamic language switching and scroll animations
- Implemented Schema.org structured data, Open Graph meta tags, and Formspree contact integration

• EXPERIENCE

Semiconductor Equipment Engineer

Apr 2026 — Present

Alten Japan (Assigned to SCREEN Takaoka) · Takaoka, Japan

- Execute precision assembly across mechanical, electrical, and module integration phases for semiconductor fluid delivery systems
- Perform digital-instruction-based assembly with I/O verification and cross-checks under zero-defect tolerance
- Manage high-precision chemical process modules (H2SO4, DDI, DHF, IPA) following strict safety protocols
- Create and maintain technical documentation, SOPs, and quality checklists for calibration and troubleshooting
- Mentor newly assigned team members on assembly procedures and quality checkpoints; enforce cross-verification to prevent defects

Building toward a backend and cloud engineering career through AWS certification and hands-on projects.

Auditor / Management

Jul 2018 — Nov 2022

Todi Tulsyan & Co. · Mumbai, India

- Conducted financial and operational audits for clients across manufacturing, insurance, and banking sectors
- Performed data analysis using advanced Excel (pivot tables, VLOOKUP, macros) to identify discrepancies
- Managed parallel projects across multiple industries with strict compliance and documentation standards
- Filed GST and income tax returns for multiple clients using Tally ERP
